### Background Colors

We have a few background colors that can be used in various contexts. These are not for use as the entire page background but instead for specific components and modules on the page.

#### Colors

			
backgroundLowLight	backgroundHighlight	backgroundBasic	backgroundInverse

### Buttons

Button styles can be applied to any element. Typically you'll want to use either a `<button>` or an `<a>` element:

Example

Click [Trulia!](#)

```
<button class="btn btnDefault">Click</button>
<a class="btn btnDefault" href="trulia.com">Trulia!</a>
```

If your button is actually a link to another page, please use the `<a>` element, while if your button performs an action, such as submitting a form, use the `<button>` element.
